

Sulfadimidine -KLH ConjugateCatalog number: 50027
Unit size: 1 mg**Product Details**

Storage Conditions	Freeze (<-15 °C)
Expiration Date	12 months upon receiving

Chemical Properties

Appearance	Liquid
------------	--------

Applications

Sulfadimidine-KLH conjugate is used for developing anti-sulfadimidine antibodies that are typically used in an ELISA assay. The anti-sulfadimidine antibodies may also recognize sulfamerazine, sulfadiazine, sulfamethoxydiazine, sulfachloropyrazine, sulfaquinoxaline, sulfadimethoxine, sulfadoxine, sulfachloropyridazine and sulfapyridine. Sulfadimidine-KLH conjugate has multiple sulfadimidine molecules on each KLH to maximize its immunogenicity.
