## Anti-GFP, DyLight ${ }^{\circledR} 488$

## Source: Goat

General description: Goat polyclonal antibody to GFP (green fluorescent protein) conjugated to DyLight ${ }^{\circledR}$ 488. GFP is a protein composed of 238 amino acid residues ( 26.9 kDa ) that exhibits bright green fluorescence when exposed to blue light. In cell and molecular biology, the GFP protein is frequently used as a reporter of expression.

Alternative names: Green fluorescent protein antibody.
Form: Polyclonal antibody supplied as a $100(2.5 \mathrm{mg} / \mathrm{ml})$ aliquot in PBS, $20 \%$ glycerol, $0.05 \%$ ProClin® ${ }^{\circledR}$ and $0.05 \%$ sodium azide.

Immunogen: Purified recombinant peptide produced in E. coli.
Specificity: In 293HEK cells transfected with cds plasmid detects a band of 27 kDa by Western blot. This antibody does not recognize mCherry fluorescent protein.

Reactivity: Reacts with Transfected cells proteins

| Sample | WB | IHC (F) | IHC (P) | IF | ELISA |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Transfected cells | +++ | +++ | ND | +++ | ND |
|  |  |  |  | +++ excellent, ++ good, + poor, ND not determined |  |

## Usage:

WB: $\quad 1: 500-1: 5,000$
IHC (F): 1:50-1:1,000
IF: $\quad 1: 50-1: 1,000$
Storage: Store at -20 C for long-term storage. Store at 2-8 C for up to one month.
Special instructions: Avoid freeze/thaw cycles..

For research use only, not for diagnostic use

## SICGEN's Proprietary Immunogen Policy

In order to produce high specific antibodies SICGEN has invested a lot of time and effort into selecting immunogen sequences. SICGEN has decided to protect this information by not publishing it on the website. However, these sequences are available on request.
